DETAILED ACTION

Claims 5-10 and 22-24 are pending in the instant application.

Response

Applicant's remarks and amendment the claims filed on 4/2/2006 are acknowledged.

Claims 5-7 drawn to methods of using a phosphono compound of the elected subject matter, Claims 8-10, are rejoined.

Claim objections

Claims 5-7 are objected to in that they are not directed to the elected subject matter and contain non-elected subject matter. Claim 5 should be made dependent on the allowable subject matter claim 8. The claims will be renumbered so that current claim 8 is claim 1 to correct the multiple dependency issue.

This application is in condition for allowance except for the presence of claims 22-24 directed to an invention non-elected with traverse in the reply filed on 4/3/2006.

Allowable subject matter

Claims 8-10, directed to 5-phosphonodipyrromethane compounds are allowed. The closest prior art of record is Lindsey et al., "Investigation of the Synthesis of Ortho-Substituted Tetraphenylporphyrins," April 21, 1988, J.Org. Chem., Vol. 54, pages 828-836, especially page 833. The difference between the prior art of Lindsey and the claims is that in the instant application the aryl group off the dipyrromethane group is substituted with a phosphonate group, while in the prior art of Lindsey the aryl group is unsubstituted.

A telephone call was placed to Attorney Kenneth Sibley on 04 May 2006 and an agreement was not reached.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
